

## The PurEauMax ultrafiltration system.

- Remove chlorine and chlorination byproducts.
- No more bad taste and bad odors.
- Best water for coffee, tea and meals.
- No needs for a pressure vessel under the sink, keep the room for your usage.

The ecological and economical alternative to conventional water treatments.

Triple stage ultrafiltration system

The **PurEauMax Triple Stage Ultrafiltration System** offers effortless quarter-turn filter cartridges that change in seconds *without the need to turn off the water supply!* Each cartridge is color coded for easy and trouble-free selection and installation. Cartridges range from sediment, odor and taste, chlorine, chlorination byproducts reduction and a 0.01 micron ultrafiltration membrane.

Remove and install in a ¼ turn only

The **PurEauMax triple stage ultrafiltration system** is also ideally suited for commercial foodservice and beverage machine applications. They are a quality alternative to other commercial filters, combining precise filtration and value to protect vital equipment and to *keep business operating costs low.* Perfect for coffee and espresso machines, ice makers, juice machines or other appliances that are supplied from a tap water source.

Cartridge Model No	Filtration Type	Flow Rate	Capacity (L)	Service Life	Working Pressure (PSI)	Inlet/Outlet Size	Dimensions
V360UF	Taste, odour, cyst reduction Hollow fiber	1.9 LPM		~ 1 year	30 ~ 80	¼"	2.5" x 12"
